- Design Patterns

Resume

Full Stack Developer specializing in PHP (Laravel/Symfony) and Vue.js, with a keen interest in design patterns for creating clean and scalable solutions.

Experiences

Full

(PHP,Symfony,VueJS)

decq

Conducted business process analysis, drafted functional requirements, optimized order management workflows (importing from Magento 2), developed user management features, and designed REST API integrations. Automated invoice generation and distribution for domestic and international clients, integrated SEPA payments with GoCardless, and provided internal support through Zoho. Additionally, contributed to a SaaS project for production scheduling, including dynamic schedule management, automated pre-reservations, and production time optimization.

Stack

Jun 2023 - Up to now

Full Stack (PHP,Symfony,VueJS)

Jun 2023 - Jun 2024

Wobz

Managed client relationships and inquiries, oversaw order processing and stock management, coordinated production, logistics, and delivery with carriers, and handled accounting tasks such as invoices, quotes, and account statements.

Full Stack Developer

Jul 2022 - Jul 2023

YouCode

Learn soft skills and develop applications (backend and frontend) to enhance knowledge through hands-on practice.

Full Stack Developer

Apr 2021 - Jun 2021

MORITSOFT - Internship

Creation of a web application for insurance management: managing clients, cases, vehicles, case installments, and payment settlements.

Projects

YOUTRAIN™ - Booking System

The project involved an admin panel where the administrator could manage cities, train stations, trains, bookable trips, as well as view and manage reservations. Passengers were able to browse available trips, search by departure and/or arrival stations, and book tickets.

Laravel MySQL HTML5 CSS3 (Bootstrap) Javascript Git

Study Office Management System

The project involved managing individual and corporate clients, the services offered by the study office, and the intermediaries involved in the projects. It also included managing currencies for international transactions, issuing invoices to clients, and

processing received payments. Additionally, a role management system was implemented, distinguishing between administrators and assistants.

Personal Portfolio Website

Created a personal portfolio website using HTML and CSS to showcase my skills, projects, and professional achievements. The website is designed to provide a clean and user-friendly interface for potential employers or clients to learn more about my work and experience.

HTML CSS

Courier Management System

The project involved the management of both outgoing and incoming couriers, with a system for assigning couriers to departments. It also included user profile management and the implementation of a role management system to define user permissions. Additionally, a notification system was integrated to inform users of new couriers or important actions.
